TIERS Marie – Full-stack development and QA internship

Duration: 8 to 10 weeks from 26 April 2027

SKILLS

- **Software testing** (Jira, Postman, PHPUnit, JUnit, Mockito): unit, integration, functional and automated tests (Selenium, Cypress)
- **Web and mobile web development** (VS Code, JetBrains suite, Eclipse): Java, Python, Bash, HTML, CSS, JS, React, PHP, Laravel, SQL, PL/pgSQL, NoSQL, Docker
- **Project management (DevOps), versioning**: V-model, agile, CI/CD, Scrum, Kanban (Trello, Xray), Git (GitLab, GitHub), wikis (Confluence)
- **Modelling**: *Merise* (French method), UML
- **Systems, networks**: Unix, Windows, TCP/IP, DNS, DHCP, routing, cabling
- **COBOL**: "From Zero to COBOL" MOOC, premium level (in progress)
- **Languages**: professional and technical English (daily meetings with the USA, the Netherlands, Bulgaria and India); fluent Spanish

EDUCATION AND QUALIFICATIONS

- 2025 (Sept) – 2028 (Aug) — ***BUT* in Computer Science** (French three-year Bachelor of Technology), *IUT de Lens*, Université d'Artois
- 2025 (April – July) — **Software Tester** specialisation (*AFPA* Roubaix, adult vocational training), **ISTQB Foundation (CTFL v4.0)** certified
- 2025 (February – April) — **Software development fundamentals** (*AFPA* Roubaix): algorithms, web and mobile web development

PROFESSIONAL EXPERIENCE

- 2025 (January, June – July) — **Software tester / Worldline SA** | *Functional testing and performance measurement of European banking applications and websites (DE, CH, BE, FR); accessibility audits against WCAG and* RGAA *(French standard); first steps in test automation.*
- 2025 (January) — **Coding and robotics workshop**
  Programming the behaviour of an Arduino wheeled robot with Studuino.
- 2020 — *Resource Manager* / Adecco Outsourcing
  Supervised the Apple Maps roll-out in France *(5* départements *in my charge); managed an international team of 10 people and coordinated logistics across Europe.*

GitHub

"Computer Science student (*BUT*) specialising in software testing. I design, develop and validate multi-tier applications. I want to put my dual development / QA background to work on real projects. Goals: **an internship, then a work-study contract, then a permanent job, same company.**"

INTERESTS AND ACHIEVEMENTS

- Building websites, notably for my France – UK twinning association (personal project)
- Application development (team: front- and back-end website, Otaku List, Space Invaders game; solo: ToDoList+, Pac-Man game)
- Interested in home automation, robotics, ethical hacking, CAD / CAM, prototype design and bioinformatics
- Desktop publishing (Photoshop, InDesign), audio and video editing
- Elected student representative and eco-delegate coordinator (Université d'Artois)

Examples available on GitHub or Google Drive.
